

Potential Value Of Immense Salt Deposits Of Northern Alberta

Salt, which is such a vital necessity in our everyday life, has always been a plentiful and cheap commodity in Canada, says the Northern Alberta Intelligence Service of the Department of the Interior. In no place, however, has it ever been cheaper and more easily obtained than in the vicinity of Fort Smith, in Northern Canada. Here the Hudson's Bay Company, the various industries and other inhabitants of that district secure their yearly supply simply by wading in up into each and packing it away.

The source of this salt is a number of salt springs, which are located along what is known as the Salt River, on the boundary of the new Wood Buffalo Park. This park has recently been created by the Dominion Government to provide protection to the only remaining herd of wild wood buffalo.

When millions of buffalo roamed freely over practically one-third of this continent extending all the way from Mexico to the Mackenzie River, the salt springs were the only meeting ground for the buffalo, when they came to lick up the salt. It was no doubt while following these salt springs that the white man first became aware of the existence of these salt springs.

Mr. Alexander Macrae, on his voyage of exploration through the district in 1780, located and reported upon these salt springs. In 1805, William Harmon, of the Northwest Company, wrote in his journal in 1805, "Several miles from the (Chibouche) down Salt River, there are several places where almost any quantity of excellent, clean, white salt may be taken with no more exertion than along the seashore. From these places the greater part of the Northwest is supplied with this valuable article."

These springs have always been a source of supply for salt for the inhabitants of the district, and the Lower Mackenzie Valley. The native Indian is not, and has never been, in want of salt in any season. The water from these springs carries an almost saturated solution of pure salt, part of which is precipitated as soon as it comes in contact with the atmosphere, with the result that mounds of salt from three to five feet in height and in some cases of the diameter are to be found at the mouths of the springs.

O. McDonald, the Geologist Surveyor, in his report of his explorations in this district in 1887, mentions several salt springs during his trip to the river, near Fort Smith, and says that the salt is remarkably pure.

The deposits vary in size up to 100 ft. From three to five tons are collected annually. The salt has also been tested by both the Department of Mines at Ottawa and the Department of the Interior at Edmonton, and has been reported upon as being practically pure.

The deposits are situated in the vicinity of the Natural Resources Intelligence Service, Department of the Interior, while exploring the present habitat of the wild wood buffalo. The area in which is found these salt springs is 260 miles north of the present terminus of the Alberta and Great Waterways Railway and is reached by way of the Athabasca and Peace Rivers, lying to the west of the river from fifteen to twenty miles in a straight line. Their economic value at present is restricted because of the distance from the outside market and railway transportation. They have, however, a very important potential value in the vicinity of this district and particularly in the vicinity of the Athabasca and Peace Rivers, which contain some of the best fish on the North American coast.

Northern Alberta, however, has many other salt deposits, the most notable of which from the standpoint of possible commercial development are those at McMurtry, near the head of the Alberta and Great Waterways Railway. According to test borings made by the Alberta Government in 1919 and 1920, there is from twenty-five to thirty feet of salt of commercial value at a depth of 631 feet. At least fourteen feet of this deposit occurs in the form of transparent, colorless rock salt. This boring was made to a depth of 635 feet. It is reasonable to expect, from the conditions at the bottom of the borings, that there may be even a greater thickness of rock salt up to the depth reached.

Quitting the salt used for the gift and sea fisheries and for chemical industries, Canada in 1921 used 100,000 tons of salt per annum. A conservative estimate, therefore, of Alberta's salt consumption might place it at 25,000,000 lbs. With almost an equal

consumption in each of the adjoining provinces, Saskatchewan and British Columbia, a ready home market is available for any development which may be undertaken of these deposits.

Hoppers and Sawflies

These insects Cause Most Trouble in Stubble-in Crops

Nearly all of the stubble-in crop in the open prairie, grasshoppers and sawflies, our two greatest field crop insect pests, are practically confined to this same stubble-in crop. It is well known that both insects cause the most trouble to stubble-in crops. Grasshoppers will undoubtedly diminish greatly in number if no crop were put in an stubble, while sawflies, if not entirely wiped out, would become negligible in numbers. This depends, of course, on the care taken in otherwise preparing the stubble for crops.

Plowing should be done carefully and more than five inches deep. A skimmer or folder should be used. Spring plowing it should be done immediately. Sawfly puparia and grasshopper eggs are now resting in the stubble. If the stubble is not "deep" plowed and packing this spring will emerge in countless numbers in June and continue to multiply and re-infest the grain crop.

Where at all practicable farmers should by all means also use the stubble in practice if sawflies and grasshoppers are plentiful. Just what will happen if the present plan is followed is hard to tell. It is at least a possibility that the loss from insects (as well as weeds) will continue to mount up to the extent of \$500,000. From these things and the relative immediate merits of stubbling-in and fall or spring plowing.

Canada's Export Of Meat

Big Gain Shown In First Three Months Of Year

Canada exported to Great Britain during the first three months of this year \$2,615,000, as compared with \$2,000,000 in the corresponding months of last year, 27,017,000 lbs. of bacon against 24,439,700 lbs. and 2,050,000 lbs. of pork against 120,000 lbs. She exported altogether in the first quarter of this year against the same period last year 4,676,000 lbs. of beef against 3,858,600 lbs.; 27,396,000 lbs. of bacon against 21,427,800 lbs.; and 1,211,000 lbs. of pork against 100,000 lbs. There was a drop to 31,000 lbs. of mutton compared with 111,000 lbs. last year.

Solving Chicago's Traffic Problem

Immense Road Over River Is Latest Plan Proposed

A road over the Chicago River ten miles in length, carrying boulevard, parks, gardens and other things, has been proposed as the solution of Chicago's traffic problem. The route would be 200 miles wide, of miscellaneous concrete supported on concrete piling sunk into the river bed. On the road would be two sidewalks, 15 feet wide; two boulevards, 20 feet wide, and a vacant space in the center, 50 feet wide. The proposed plan would not interfere with river traffic as it would be constructed from 20 to 30 feet above the surface of the water.

New Brunswick Protects Forests

Must Have Permit Before Going On A Trip Into Forests

A proclamation has been issued by the Minister of Lands and Mines, in which all forest land in New Brunswick is proclaimed a protected area. No person may enter upon any forest land between May 1 and November 1 to camp, fish, hunt, or for any other purpose, without first registering with a fire warden, or other authorized person, and obtaining a registration certificate.

A Matter of Taste

Crowds in front of Buckingham when the Duke of York was married elicited a demand for the Prince of Wales. The Duke of York did not appear. It was not his day and he knew what good taste demanded. Similarly, the knowledge of the plaudits of his people several years ago when President Wilson rode as the nation's guest through the streets of London—Ottawa Journal.

800 Settlers From U.S.

Bringing with them effects valued at \$75,000 and monetary wealth totaling \$121,532, approximately 800 settlers from the United States came to Canada between Kingston and North Parry during April, according to the latest reports.

Business Is Good

Healthy Tone Reported in Many Lines of Trade

According to reports from traveling men doing business in the prairie territory, business prospects in the west are showing rapidly and a greatly optimistic note is being sounded by manufacturers, retailers and wholesalers. It is reported that with the opening of spring sending the tone of the retail trade has greatly improved. Increased orders are being received for nearly every class of goods, especially coats and shoes, men's and ladies' ready-to-wear garments and hats and coats.

This improvement is in spite of the increasing tendency toward higher prices in nearly all lines. Money is said to be more plentiful on account of the grain movement and with prospects for a greater acreage some \$5,000,000 will be invested this season in new elevators in the prairie.

Collectors are reported by banks, merchants and mortgage companies to be much improved. With weather conditions good, railway traffic is becoming more and the demand for unskilled labor is good.

Winged Lightning

Wonderful Speed Now Attained By Modern Air Ships

Two hundred and eighty-one miles an hour was attained by a racing plane at the Army Aviation Station at Dayton, Ohio, recently, by Lieutenant G. S. Matlack. This speed put the machine ten hours from Liverpool. The average speed was 243 miles. Alcock and Brown averaged 100 miles an hour. In their world flight around the Atlantic in 1919. They had a westerly gale behind them. It took them sixteen hours to get from Newfoundland to Ireland. A few years ago the world's records for speed was 80 miles an hour attained by ice boats on the Hudson. At 230 miles an hour, Lieut. Matlack could get around the world in less than ten days.

Garage May Displace Old Historic Houses

People Protest Against Commercial Invasion of Kensington Square

Kensington square, in London, dating from the days of William III, is threatened by a commercial invasion. To provide a garage for commercial vehicles, it is proposed to raise one of the old houses on the north side. Addison, Steele, Tylney and John Stuart are the names of the prominent persons that at one time lived in this charming spot. The buildings, and other others are preserved against the step which would irretrievably damage the historic square.

The Best Macaroni

St. Catharines, Ont. has the honor of being the place of the man who makes the best macaroni in the world. His name is A. Puccini, and the macaroni made by him took first prize at the International Exhibition held recently in Rome. Without desiring to deprive Mr. Puccini of any of the credit, his success was probably due partly to the good Canadian flour made by the good Canadian wheat that he used in the manufacture of his prize macaroni.—Hamilton Herald.

The Japanese begin building their houses at the top. The roof is first built and elevated on a skeleton frame. Then it affords shelter to the workmen from storms.

And it sometimes happens that the things you do may be more to be regretted than the things you did say.

ACREMENT HARBOR

Mr. B. Miller (Progressive, Q/A) asked the attention of the Government in the House to a report that some of the Canadian cattle recently shipped to Great Britain were tubercular. Hon. W. H. Matthews, Minister of Agriculture, said that the fact that the cattle were tubercular. The cattle had been tested and found to be free from disease before leaving Canada.

Cattle Not Tubercular

Mr. B. Miller (Progressive, Q/A) asked the attention of the Government in the House to a report that some of the Canadian cattle recently shipped to Great Britain were tubercular. Hon. W. H. Matthews, Minister of Agriculture, said that the fact that the cattle were tubercular. The cattle had been tested and found to be free from disease before leaving Canada.

He Who is going abroad to seek his fortune

"You'll be true to me when you're far away," said the man who was going abroad to seek his fortune. "You'll be true to me when you're far away," said the man who was going abroad to seek his fortune.

Mr. H. Champ was in Calgary for a few days this week on business.

Mr. J. Hitchen left last Monday for Banff, where he has accepted a position in a dairy.

A number of Redcliff residents, who are at present working in Brooks, came down to spend the last week end.

The baseball game scheduled for last was postponed, as the team from the Hat was unable to make its appearance on the track.

Mrs. H. J. Cox this week attending the Luncheon Convention of the W. A. of the Anglican church in Regina, representing Medicine Hat Diocese.

The Jr. W.A. of St. Ambrose church will hold an ice cream social and meal of home cooking on Saturday, June 16th, from 2:30 to 6 p.m.

A number of the members of the 1st Bn. Alberta Regiment will leave on Sunday night's train for Calgary, where they will undergo training at Barrage camp for the next two weeks.

Miss D. Kearney left last Friday for Calgary, where she has secured a position. Miss Kearney was formerly employed on the Royal Bank staff here.

A meeting of the town council was held on Monday night, but nothing of importance was up for discussion. The monthly accounts were passed and ordered paid.

Mrs. F. Osgood left for the east at the beginning of the week to join her husband. They will make their residence in Hamilton, where Mr. Osgood secured a position some time ago.

We are informed by Mrs. J. Kitchen that Mrs. Arthur Timmott and family, of Vancouver, wish to thank all the residents of Redcliff who kindly wrote to them during their recent and bereavement.

Parents are requested to remind their children that on account of the U.F.A. service it is to be held at 3 p.m. on Sunday first, June 17th, Gordon Memorial S.S. will meet at 2 p.m. Thank you.

There will be a practice of the United choir of the three churches in town, in the Presbyterian church tonight (Thursday), at 8 o'clock, in preparation for the U.F.A. service on Sunday afternoon.

All pupils of the Redcliff school who are entering essays in the competition for prizes given by Mr. L. G. Colwell, local agent for the London Life Insurance Co., are reminded that their essays should be handed to Mr. Colwell by June 20th. The subject is "The Value and Importance of a London Life Insurance Policy." Mrs. E. L. Stone, Rev. J. H. N. Mills and Rev. T. S. Paton have kindly consented to act as judges.

Owing to the inclement weather of Wednesday night, it was impossible for the Salvation Army to appear and put on the concert as intended. However, it is their intention to put on this programme (tomorrow Friday) night. At about 7:30 the band will commence the concert for an hour, and at 8:30, in the Howard building, will be a programme of instrumental and vocal selections. The concert put on by the Army are well known to be of a most enjoyable kind, and a cordial invitation is extended to all to be present. All seats are free.

The football game last Thursday evening between the local juniors and the Medicine Hat Cutlers juniors resulted in a draw neither team being able to locate the net. The game was fast and furious and was evenly contested, each team making some great runs, but the work of the forwards was neutralized by the splendid play of the defence on both sides. Mr. A. Maxwell acted as referee, and it is said that the juniors gave him as much running about as if he had been taking part in a senior game. There was a good crowd of spectators present at the game.

The copious downfall of rain which fell over this district Wednesday afternoon will prove of immense benefit to the growing crops, especially after the very hot weather of the previous week. While the present heavy rainfall was too late in some parts to do the good that was hoped, nevertheless the farmers are in a more optimistic and contented frame of mind, and while some of the crops may not be as heavy as hoped, the recent generous supply of moisture will improve the feed situation immensely. Yesterday's downfall lasted for about six hours steady, and was general over the entire surrounding district.

Surveying Road From Peace River to Coast

The Edmonton Journal says: "The Canadian Pacific Railway company is contemplating the construction of a direct outlet for the Peace River country at a cost of from \$50,000,000 to \$50,000,000, the conclusion reached by the Journal after thorough investigation of the personnel of various survey parties now at work in Central and Northern British Columbia and the nature of the survey they are making. Two alternative routes are being investigated—one due west from Spirit River, on the Portland canal north of Prince Rupert, the other southwest, to connect with the main line of the C.P.R. at Kamloops or Lytton. Either route would involve an extension of the Peace River-Berwyn line through the country north of Peace River to the vicinity of Hudson's Hope, where it would cross the Peace River on a high level bridge and join the main line from Spirit River.

"Confirmation of this is not forthcoming from E.D. & B.C. officials here or those of the C.P.R. at Winnipeg, but the Journal has definite and authentic information regarding four survey parties that are now in the employ of the C.P.R. and for the purpose mentioned."

June Precipitation Is Best In Years

June is steadily following the excellent precipitation of May and there has been some rain almost every day over large stretches of the province. For the most part this additional moisture has been in the nature of showers, which, in many instances, have been exceptionally heavy and of material benefit to all growing crops. Reports from all sections of Alberta are to the effect that general conditions and prospects have never been better since the banner crop year of 1915.

LARGE CATTLE SHIPMENT

More than 600 head of cattle were shipped from the Union Stockyards, Winnipeg, for Great Britain last week by the United Grain Growers. This is the largest single shipment made by the company, and it took 30 cars to take away the cattle. Practically all the cattle are being shipped to Dunelm.

NOTICE

TOWN OF REDCLIFF.

Notice is hereby given that if all arrears of taxes imposed in 1922 in respect of any parcel of land situated within this Municipality are not paid on or before the First day of July next, such land will be dealt with under the provisions of the Tax Recovery Act, 1922, with a view to obtaining Certificates of Title in the name of the Town in respect of each parcel.

Secretary-Treasurer, Town of Redcliff

MILITARY CAMP

All members attending this camp will draw uniform and equipment from stores, Thursday, June 14th, at 7:30 p.m., and will leave on Train No. 1, June 17th.

The attention of all members of "C" Company, 1st Bn. Alberta Regt. is called to the Camp School being held at SARGENT CAMP, 22 miles N.E. of Redcliff, commencing on June 18th and ending July 3rd, 1926.

TRANSPORTATION—This will be provided from Redcliff to Sargee Camp free.

PAV—Each man attending Camp will draw pay on the following basis: Privates under two years' service \$12.50 per diem.

Privates over two years' service \$15.00 per diem.

RATIONS—The regular Army rations will be provided free.

All ranks interested in Military Training should make a special effort to take advantage of this Camp. As our allotment is sixteen only, those desirous of attending are advised to communicate with the Officer Commanding the Company without delay.

R. C. HARGRAVE, Lieut. for "C" Coy. 1st Bn. A. R., Redcliff.
